

Dog Adoption Application Setup Instructions

Prerequisites:

- Node.js (version 18 or higher) must be installed
- npm (Node Package Manager, comes with Node.js)

Setup Instructions:

1. Clone or download the project files to your computer
2. Open terminal/command prompt and navigate to the project directory:

```
cd path/to/project
```

3. Install dependencies:

```
npm install
```

4. Start the development server:

```
npm run dev
```

Important Notes:

- The application will run on <http://localhost:5173> by default
- The application requires an internet connection to communicate with the Fetch API service
- Make sure no other application is using port 5173
- The application works best in modern browsers (Chrome, Firefox, Safari, Edge)
